Version 8.6.1

Release Notes

Version 8.6.1 Release Notes

Snow Commander® Release Notes for version 8.6.1, covering new features, upgrade notes, deprecated and removed features, resolved issues, and known issues. To access release notes for previous releases, go to the [Release Notes Archive](#).

What's new

There are no new features for version 8.6.1.

Upgrade notes

You can upgrade to Commander version 8.6.1 from versions 8.0.x - 8.6.x. See [Upgrading Commander](#) in the Installation Guide.

Before upgrading, it's recommended that you review all release notes between the version you're currently using and the version you're upgrading to. Release notes for previous Commander versions are available at [Release Notes Archive](#).

Deprecations and removals

There are no deprecations or removals for version 8.6.1. Any deprecations or removals encountered in subsequent 8.6 releases will be noted in the relevant release notes.

Resolved issues

- **19893** In some cases, Commander upgrades could fail when using SQL 2012 or 2014 as the database. This no longer occurs.
- **19992** After a billing reset for a private cloud account, support costs configured to be applied continuously are now properly applied to VMs that are powered off.

Known issues

There are no known issues for version 8.6.1. Any known issues encountered in subsequent 8.6 releases will be noted in the relevant release notes.
