What's new

Multicurrency customization

Upgrade notes

You can upgrade to Commander version 8.9.1 from versions 8.0.x - 8.9.0. See [Upgrade Commander](#).

Before upgrading, it's recommended that you review all release notes between the version you're currently using and the version you're upgrading to. Release notes for previous Commander versions are available in the [Release Notes Archive](#).

Deprecations and removals

There are no new deprecations or removals for version 8.9.1. Any deprecations or removals encountered in subsequent releases will be noted in the relevant release notes.

Resolved issues

- **22238** When trying to add Selectable Disk Types to an Azure Storage service catalog form, the SSD and HDD options are no longer missing.
- **21948** When removing several NICs from a VM, all corresponding IPs are marked as free in the IP pool to which they belong.
- **21830** If a plugin workflow step fails, the corresponding workflow is appropriately marked as failed.

Known issues

There are no new known issues for version 8.9.1. Any known issues encountered in subsequent releases will be noted in the relevant release notes.
